

NEWSLETTER MAY 2014

Enhancing Mediterranean Initiatives Leading SMEs to Innovation in building Energy efficiency technologies – EMILIE

INSIDE THIS ISSUE:

- Welcome to the First Issue of the EMILIE Newsletter!
- Exciting Pilots on their Way!
- Mapping of EE SME Support and Development Institutions
- First Capitalization Meeting in Spain
- Second Capitalization Meeting in Croatia

Partners:

Italy - AREA Science Park (Lead partner)
 France - CAPENERGIES
 Spain - Foundation CIRCE, Research Centre for Energy Resources and Consumption
 Spain - Andalusian Institute of Technology
 Slovenia - Jozef Stefan Institute
 Croatia - Regional energy agency Kvarner

Project duration:

1.1.2013. - 30.6.2015.

WELCOME TO THE FIRST ISSUE OF THE EMILIE NEWSLETTER!

This publication is the voice of EMILIE project, financed by the European Commission under the Transnational Cooperation Programme MED. EMILIE aims to support the growth potential and capacity for innovation of SMEs in the field of energy efficiency in buildings in the tertiary sector at the transnational level, in order to actively contribute to growth, competitiveness, and employment in the Mediterranean area.

Featuring key project events, research and pilot activities, this newsletter will highlight the most important news connected with the EMILIE project topic. Complementing this newsletter is our [website](http://www.emilieproject.eu) and [LinkedIn group](#), where you can find additional information on our work and goals. We welcome feedback on this issue and contributions to future issues of the newsletter and hope you will „stay tuned“.

NEWS:

Exciting Pilots on their Way!

SunLab in Trieste (Italy), HACLab in Seville and Glassolating in aragoza (Spain), SmartEE in Gap (France), InfraSUN in Ljubljana (Slovenia), SunCool in Rijeka (Croatia). These demonstration plants will be open to SMEs, clusters and regional and local administrations in charge of managing public buildings and especially public contracts for building construction and renovation, showcasing the potential of new energy efficiency systems in tertiary buildings that are among the latest innovative technologies available on the market.

First Capitalization Meeting in Spain

The EMILIE first capitalization meeting took place in Sevilla on the 10th October 2013, with the intent of identifying synergies among European projects, aiming at creating opportunities for supporting innovation in the field of energy efficiency and renewable energy.

Mapping of EE SME Support and Development Institutions

Are you interested in the existing research and innovation services and facilities in the field of energy efficiency present in EMILIE partner countries We have prepared a map that includes technical and practical information on these facilities: how do they work, where they are available, how to access to them etc., being very useful especially for innovation SMEs or energy efficiency clusters but also to other stakeholders.

Second Capitalization Meeting in Croatia

The second EMILIE capitalization meeting took place in Rijeka on the 22nd January 2014, with the aim to create new synergies and share methodologies on innovation, energy efficiency in buildings, renewable energies and green policies.

UPCOMING EENTS:

[Sustainable uilding and Refurbishment](#) Conference, rokerage Events and Project isits, ienna Austria, 2 2 May 2014

EMILIE 3rd Steering Committee meeting and 3rd Capitalization meeting, Ljubljana Slovenia, 10 11 June 2014

[EU Sustainable Energy Week](#), Europe-wide, 23 2 June 2014
